INTRODUCTION

Excellence isn't optional — it's the baseline.
Most businesses lose users — not because their idea is weak, but because their interface fails to connect.

I'm Anishe Eniola Olumide, a Passionate Full-Stack Software Engineer (Web & Mobile) with over four years of immersive experience building user-centered, high-performance digital products. I help brands, startups, SMEs, and enterprises create high-performing, scalable, and pixel-perfect experiences that enhance brand presence and are designed to convert, perform, and inspire trust.

Because great products deserve great interfaces, I align UX strategy with measurable growth — ensuring users not only visit, but stay, engage, and return.

I design, build, and refine web apps, mobile apps, landing pages, MVPs, and enterprise interfaces, merging design precision, UX empathy, performance optimization, SEO, and accessibility into every project. To me, a great interface isn't just beautiful — it's strategic.

EDUCATION

Bingham University, Nasarawa

Bachelor Of Science, Computer Science (First Class Honors)

2021 - 2025

Best Graduating Student, Faculty of Computing — **CGPA: 4.89**

WORK EXPERIENCE

Freelance Frontend Developer

Remote · 2021 - March 2024

- Built responsive websites for small projects using HTML, CSS, and JavaScript.
- Developed clean and reusable UI components, focusing on accessibility and usability.
- Worked directly with clients to turn ideas and sketches into functional front-end experiences.
- Strengthened core skills in layout structure, responsiveness, and user interaction patterns.

Senior App Developer – Intern, Celebrations

Physical · April 2024 – September 2024

- Contributed as a core team member in developing a loyalty app across web and mobile
- Worked on secure authentication flows, points and rewards logic, Lightspeed integration, and offline functionality.
- Implemented a custom admin dashboard and ensured seamless communication between frontend and backend systems.
- Played a key role in final testing, performance tuning, and deploying app features under tight deadlines.

Frontend Developer — Harmmynet

Remote . August 2024 – December 2024

- Designed and developed **Harmmynet**, a clean and highly responsive landing page demo for a mobile laundry service application.
- Implemented a modern UI with smooth layout flow, clear feature presentation, and mobile-first responsiveness.
- Applied best practices in UI/UX to highlight services, user workflow, and brand identity.
- Delivered a polished, production-ready user interface with fast performance and pixel-perfect styling.

Frontend Developer — NewsNowNG

Remote . June 2024 – June 2025

- Led a **major UI revamp** of the entire NewsNowNG platform.
- Rebuilt core sections including homepage, category listings, and article pages for improved readability and engagement.
- Enhanced mobile responsiveness, visual hierarchy, and page performance.
- Collaborated with stakeholders to implement modern UI patterns and optimize SEO structure.
- Delivered a cleaner, faster, and more user-centered experience for a large content platform.

Full-Stack Web & Mobile Developer (Freelance)

Remote · June 2025 – Present

- Build end-to-end web and mobile applications with a strong focus on **UI/UX, performance, and modern frontend frameworks**.
- Develop sleek, responsive interfaces using **React.js, React Native, TailwindCSS, Next.js, and modern component patterns**.
- Implement robust backend solutions using **Node.js, Express, MySQL, and Firebase services**.
- Create scalable features such as authentication systems, admin dashboards, referral programs, push notifications, and real-time updates.
- Optimize applications for speed, smooth user interactions, clean design systems, and consistent cross-device experiences.
- Work closely with clients to ensure each product meets both business goals and modern usability standards.

SERVICES

I specialize in crafting digital experiences that are functional, user-friendly, and performance-driven. Here's how I can help you:

- **Custom Website Development** – Need a website for your business, portfolio, or personal brand? I create fast, responsive, and visually appealing websites tailored to your needs.
- **Mobile App Development** – Want an app for your business or startup? I build cross-platform mobile applications that work seamlessly on both Android and iOS.
- **Blog & CMS Development** – Looking to start a blog or need a content management system? I build easy-to-manage, SEO-friendly blogs and CMS platforms that put you in control.
- **Full-Stack Web Applications** – From frontend to backend, I develop secure and scalable web applications that handle real-world business needs.
- **E-commerce Solutions** – Want to sell online? I build e-commerce platforms with secure payment integrations and a seamless shopping experience.

Awards & Achievements

- Completed over about four years of immersive experience in Full-stack web Development.

- First Class B.Sc. in Computer Science with a CGPA of 4.89.

- Awarded Best Academic Performance – recognised as the top graduating student in my department and faculty.

Extracurricular Activities

- Actively participate in coding competitions and hackathons.
- Attend workshops and conferences to stay updated on the latest industry trends.
- Regularly read books on personal development, productivity, and mindset to improve both professionally and personally.
